

INDOOR/OUTDOOR SENTINA® OUTBACK LED LIGHT IS EMERGENCY-READY 24 HOURS A DAY!

Breakthrough motion- and photo-sensitive light provides eco-friendly LED light as needed for every day and emergency use.

Outback also supports cell phones for up to ten hours of talk time, making it ideal for campers!

KENILWORTH, NEW JERSEY, July 27, 2009 — A breakthrough motion- and photo-sensitive indoor/outdoor consumer LED light that also supports cell phones for up to ten-hours of talk time. The remarkable Sentina® LED -98 Outback Safety Lamp is ideal for year-round outdoor patio use, as an emergency light, or a power generating light and energy source for campers!

The rugged yet beautifully designed Sentina Outback features built-in motion and photo sensors that activate the LED light when needed when darkness falls or when homeowners walk within range. Sentina Outback is an indoor/outdoor/ patio lamp that is also emergency-ready 24 hours per day — thanks to its built-in 5V NiMH rechargeable battery and charger and crank generator. Fully charged, the Sentina Outback will provide up to ten hours of motion-sensitive lighting.

Designed to perform as needed, the stylish look of Outback, coupled with its affordable price, makes Outback an ideal for choice for every-day patio lighting. Consumers can purchase three or four units and put them in place around the patio, and immediately enjoy elegant, high quality, LED lighting!

But that's not all. Consumers can plug in their cell phones to the Sentina Outback and enjoy up to ten hours of talk time, making the Outback an ideal energy source in an emergency or for campers and hikers who want to stay connected to the world by cell phone.

The Sentina LED-98 Outback Safety Lamp is part of a complete line of Green Home lighting products available at www.datexx.com.
